DATA INTELLIGENCE

OPEN FORMATS
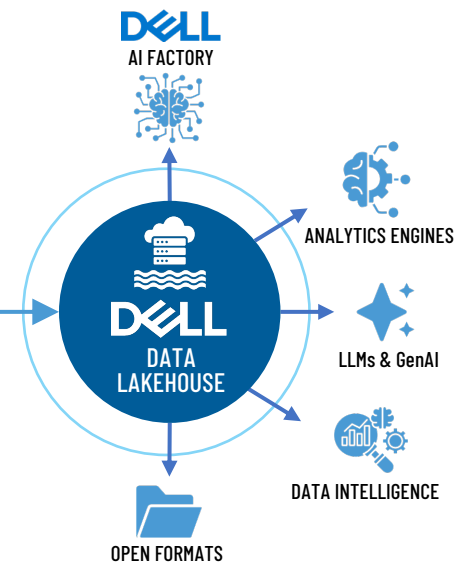

Unify all your distributed filesystems, Dell portfolio and beyond, no matter where they live.

Comprehensive data management platform with agentic workflows—curating datasets so only relevant content reaches AI/ML pipelines.

Together with Dell, Diskover enables partners to quickly **locate, curate, and route** unstructured data into AI/BI-ready pipelines, helping organizations **cut costs, accelerate insights, and unlock new revenue opportunities** at scale.

From storage to AI success.

1 **Unify and enrich all your data.**
Break down silos by indexing Dell storage and beyond into a single, searchable, and actionable metadata catalog enriched with business context—giving you full visibility and control.

2 **Filter and curate what matters.**
Apply policies and agentic workflows to filter noise and deliver only high-value, high-integrity datasets—fueling faster, more accurate analytics and AI outcomes.

3 **Move curated datasets to Dell AI Factory.**
Seamlessly route curated data into Dell Data Lakehouse and AI Factory—ready for analytics, AI models, and innovation at scale without costly re-architecture.
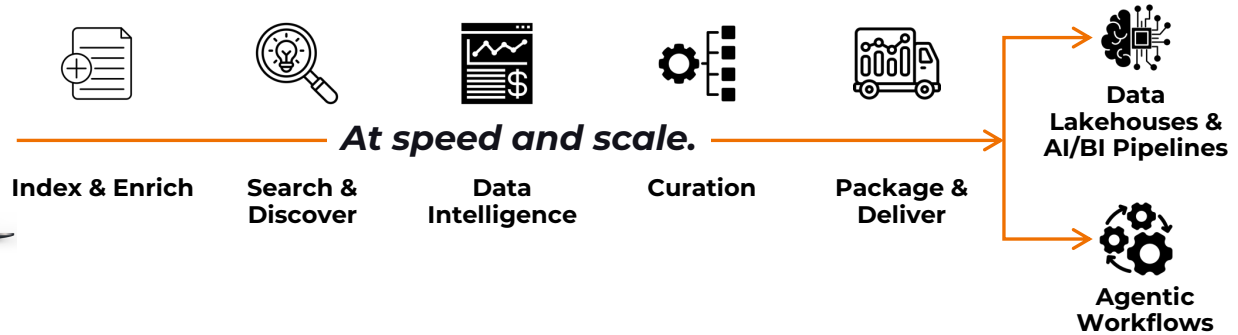

Turning unstructured data into intelligence.

Whether you're cleaning up storage, streamlining workflows, or preparing AI/BI pipelines, Diskover simplifies data management at every stage.

+

DELL Technologies

Main benefits:

Contextual metadata for deeper insight.
→ Diskover indexes Dell storage and enriches it with business context—turning raw data into actionable intelligence.

Real-time data intelligence.
→ Access real-time analytics across your entire data estate to monitor usage, control costs, plan growth, and drive smarter decisions.

Lifecycle policies that optimize storage and cut costs.
→ Automate tiering and clean-up with policy-driven agentic workflows that keep storage lean and budgets in check.

Curated datasets for Dell Lakehouse and AI Factory.
→ Feed curated, high-value data directly into analytics and AI pipelines without re-architecting.

DISKOVER INTEGRATION WITH DELL DATA LAKEHOUSE
Bridging the gap between unstructured data and AI/BI pipelines.

The integration of Diskover and Dell Data Lakehouse (DDLH) is designed to optimize metadata management, enabling enhanced organization, contextualization, and usability of unstructured data across AI and BI workflows.

DISKOVER INTEGRATION WITH DELL AI FACTORY
Diskover amplifies the Dell AI Factory—from edge to core to AI readiness.

Creating high-value AI/BI datasets from unstructured data, turning hidden data into business value.

Diskover SUPER-CONNECTOR

Helps organizations pinpoint their most valuable unstructured data across legacy storage, enabling them to find, analyze, and enrich it for smart decision-making and advanced AI/BI applications.

DELL Technologies — AI FACTORY

An open, flexible, and secure architecture that places, processes, and protects enterprise-scale data—combining PowerScale, ObjectScale, and Dell Data Lakehouse to support every phase of AI infrastructure.
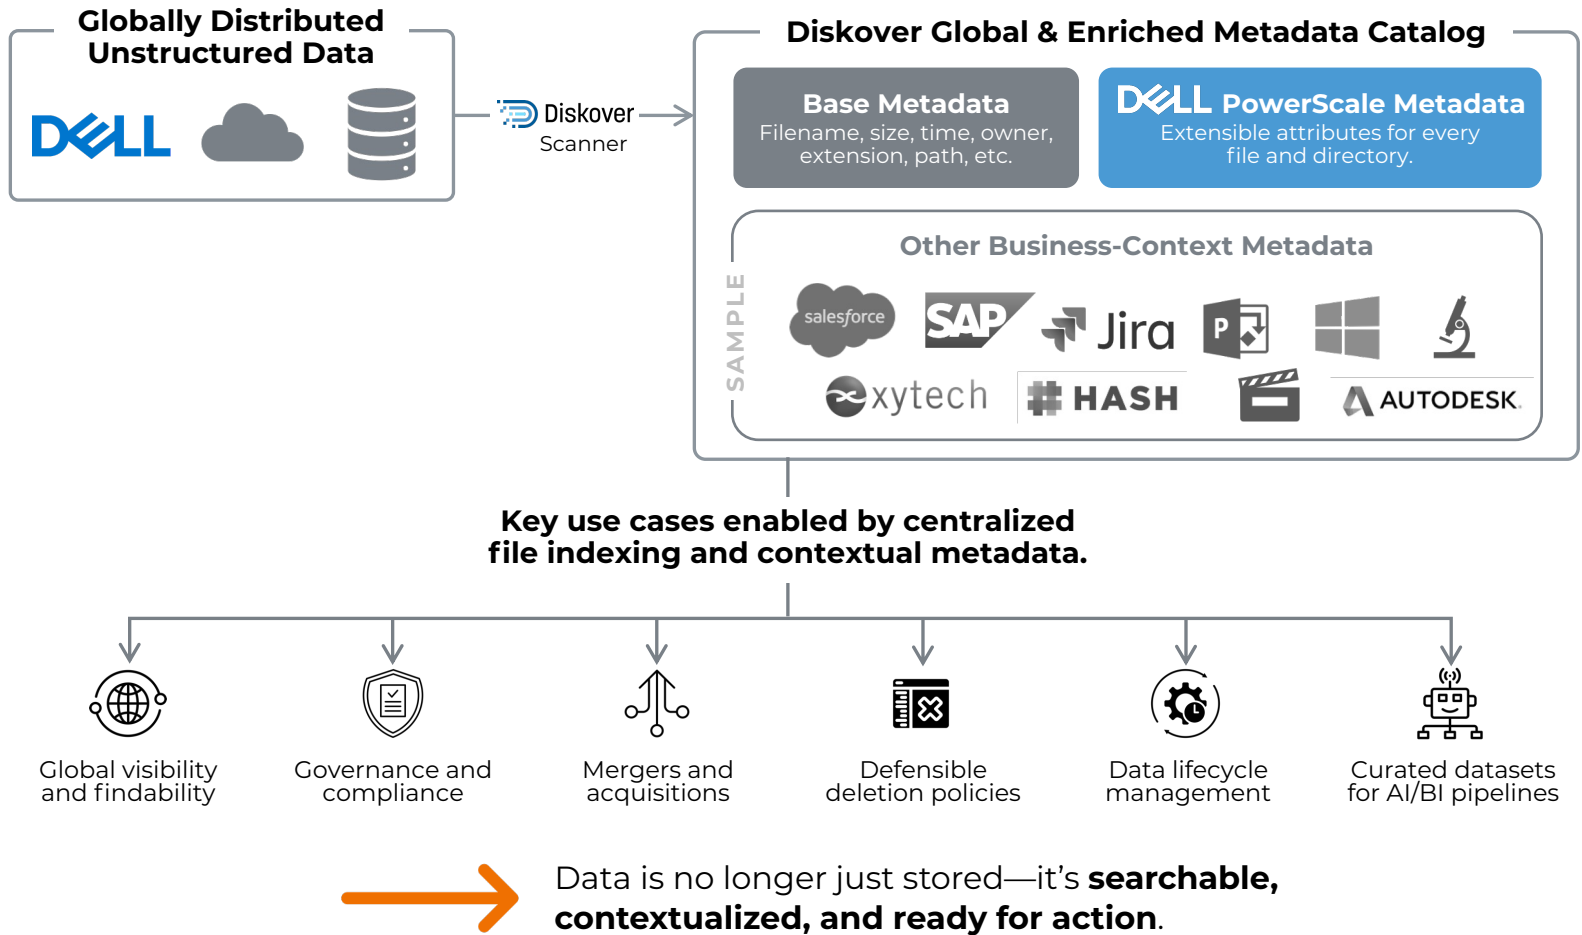

= Streamline your AI journey

Diskover makes data AI-ready, Dell makes it AI-scalable.

Together with Dell's AI Data Platform, Diskover enables partners to **quickly locate, curate, and route** unstructured data **into AI-ready pipelines**. By integrating with Dell infrastructure, Diskover helps organizations **cut costs, accelerate insights, and unlock new revenue opportunities at scale**.
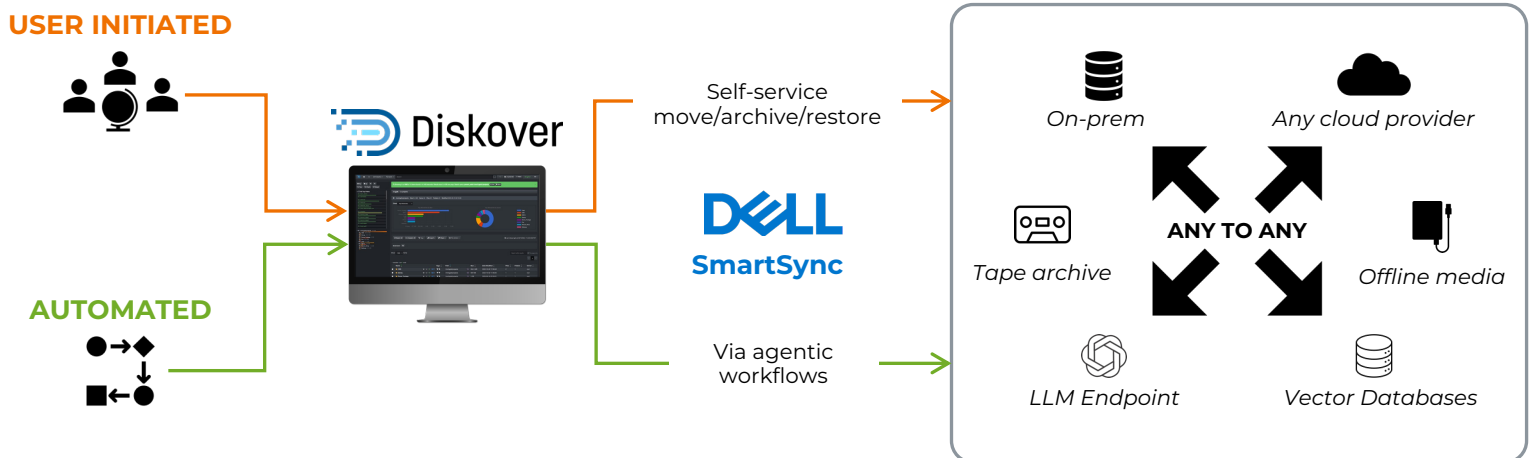

Granular control, from indexing to automation to AI.

Diskover makes PowerScale attributes searchable and reportable, driving policy-driven agentic workflows for lifecycle management and curating high-value datasets for analytics and AI.
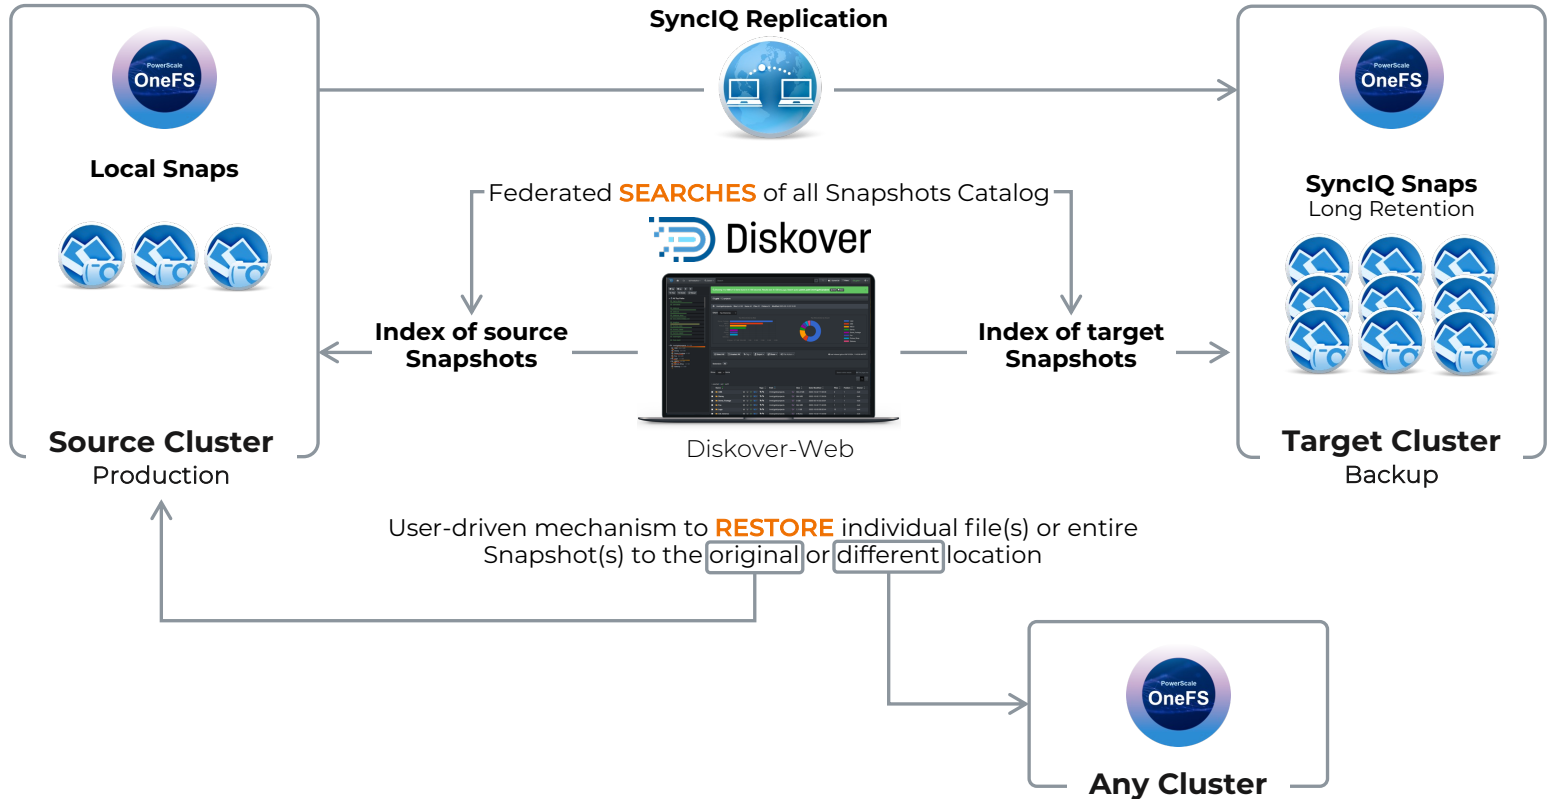

Globally Distributed Unstructured Data

Diskover Scanner

Diskover Global & Enriched Metadata Catalog

Base Metadata
Filename, size, time, owner, extension, path, etc.

DELL PowerScale Metadata
Extensible attributes for every file and directory.

Other Business-Context Metadata

SAMPLE

salesforce | SAP | Jira | P | Windows | microscope

xytech | HASH | clapperboard | AUTODESK

Key use cases enabled by centralized file indexing and contextual metadata.

| Global visibility and findability | Governance and compliance | Mergers and acquisitions | Defensible deletion policies | Data lifecycle management | Curated datasets for AI/BI pipelines |

Data is no longer just stored—it's **searchable, contextualized, and ready for action**.

The right data at the right place and time.

Move, sync, and optimize data across your Dell storage ecosystem and beyond—on demand or policy-driven automation.

ABOUT DISKOVER

Diskover transforms unstructured data into curated, high-value assets through fast indexing, enriched metadata, and intelligent automation—including an AI Data Assistant to accelerate insight and action. Designed for hybrid environments, it enables smart data movement, cost optimization, and AI/BI readiness with curated Datasets delivered to analytics platforms and data lakehouses via multistream integration. With powerful search, policy-driven workflows, and a flexible plugin ecosystem, Diskover gives organizations full visibility and control across their data estate.
